 Rahim Yar Khan

Skills

- Python
- AI & LangChain
- NLP & Deep Learning
- Machine Learning, Computer Vision
- Git & GitHub
- React.js, Next.js
- Tailwind CSS, TypeScript
- Docker
- SQL Database Management

Certifications

- Python Essentials
- Cisco Networking Academy
- Modern & Generative AI
- Cisco Networking Academy
- AI-MERN Stack Internship
- Mercury Sols

Languages

- English
- Urdu

Interests

- Chess
- Problem Solving, Analytical Skills
- Video Editing
- Content Creation

Summary

Dedicated BS Artificial Intelligence student at KFUEIT with 3 months of professional internship experience in AI-MERN Stack development. **Cisco Certified** in Python and Modern AI, with a solid foundation in **Machine Learning** and practical expertise in **React.js**, **TypeScript**, **Tailwind CSS**, and **SQL**. Developing foundational skills in **Computer Vision**, **NLP**, and **Parallel Computing (PDC)**.

Education

- KFUEIT

Bachelor's • 3.32 / 4.00 CGPA

Artificial Intelligence

Rahim Yar Khan, Pakistan • Sep 2023 — June 2027
- Currently in the **6th Semester**, focusing on advanced AI architectures and algorithm optimization. Hands-on experience with Python-based AI libraries and high-performance computing using C++.
 - Core Coursework:** Machine Learning, Natural Language Processing (NLP), Parallel Computing (PDC), EDA and Speech Processing.
 - Actively working on research-driven projects involving **Machine Learning** and **Computer Vision**.

KFUEIT

Experience

- Mercurysols

Rahim Yar Khan

AI-MERN Stack Intern

3 Months
- AI-Integrated Frontend Engineering:** Developed responsive user interfaces using **React.js** and **TypeScript**, specifically focusing on data visualization dashboards for monitoring AI model performance metrics.
 - Intelligent Backend Pipelines:** Integrated **RESTful APIs** to connect frontend logic with AI-driven backend services, ensuring efficient and scalable data retrieval for real-time applications.
 - Data Strategy & Management:** Leveraged **SQL** for complex data handling and implemented version control via **Git/GitHub** within a team environment dedicated to high-quality software standards.

MercurySols

Projects

- AI-Powered Hand Gesture Controller

Developed a real-time system using **OpenCV** and **MediaPipe** to control system volume and cursor movements through hand landmarks.
- AI Voice Assistant (GEMINI API Integration)

Developed a voice-enabled assistant using **GEMINI API** and **Python** to automate system tasks. Integrated Hugging Face models for RAG(Retrieval-Augmented Generation) to provide conversational responses based on custom data.
- Flujo – Collaborative Medical Management System

Developed a responsive and high-performance front-end for a real-world medical application using **React.js** and **Tailwind CSS**, focusing on patient dashboard optimization.
